MACARON

A French confection just got a Spanish update. For the Macaron, just as with its edible namesake, **Silvia Ceñal Design Studio** whipped up basic ingredients: The disk top and the ring base are untreated fir plywood simply CNC-routed with holes that are then threaded with polypropylene cord in either red, yellow, blue, or white. Available in two diameters, approximately 12 or 18 inches, the pendant fixture accepts an LED or a CFL bulb. silviacenal.com. **circle 416** ➤
